

Privacy Policy for Snoremetry

Effective Date: February 19, 2026

Your privacy is important to us. This Privacy Policy explains how Snoremetry ("we," "our," or "us") collects, uses, discloses, and protects information when you use our mobile application Snoremetry (the "App"). By using the App, you agree to the collection and use of information in accordance with this policy.

1. Information We Collect

a. Personal Data

We do not require you to create an account or provide personal details such as name or email to use the App. Snoremetry is designed with privacy at its core — no accounts, and no personal information required.

b. Audio Data

The App uses your device's microphone to detect snoring and monitor ambient noise during sleep sessions. When the App is in the foreground, audio is analyzed in real-time. When the App moves to the background, audio is temporarily recorded on-device and processed once the App returns to the foreground. **Audio data is never transmitted or uploaded to any server. All processing happens entirely on your device.** You can delete session data and associated audio files at any time from within the App.

If you opt in to the Snore Clips feature, short audio excerpts (approximately 10 seconds each) are saved locally on your device. These clips are stored in the app's local storage, **are never synced to iCloud or any external service**, and can be deleted at any time from within the App.

c. Camera Data

The App may use your device's front-facing camera solely to estimate ambient light levels in your sleep environment. **No images or video are captured, stored, or transmitted.** Only numerical light level readings are retained.

d. Health Data

If you choose to enable HealthKit integration, the App writes sleep-related metrics (sleep duration, sleep score, snore score, snore count) to Apple Health and may read sleep stage data from other apps (e.g., Apple Watch). All HealthKit data remains on your device and within Apple's Health ecosystem.

e. iCloud Sync

Session data (sleep scores, event timestamps, metrics) may be synced across your devices via Apple's iCloud/CloudKit service if you are signed in to iCloud. This sync is encrypted end-to-end by Apple. Audio clips are never included in iCloud sync.

f. Automatically Collected Information

When you use the App, we may collect non-personal information automatically, including:

- Device information (model, OS version)
- App usage statistics
- Crash reports and diagnostic data
- Anonymous identifiers

This data helps us understand how the App is used, diagnose issues, and improve performance.

g. Third-Party Service Data

We may use third-party services (e.g., crash reporting, analytics) that collect data about your use of the App. These services collect information directly and are subject to their own privacy policies.

2. How We Use Information

We use the information we collect to:

- Provide, maintain, and improve the App
- Analyze snoring, noise, and light patterns to generate sleep insights
- Calculate sleep and snore scores
- Generate on-device AI-powered sleep analysis (using Apple Foundation Models, processed entirely on your device)
- Understand usage patterns and diagnose technical issues
- Enhance user experience
- Comply with legal obligations

All sleep analysis and audio processing happens entirely on your device. We do not sell personal information to third parties.

3. Sharing of Information

We may share information:

- With Google Firebase for anonymous crash reports and app usage analytics
- If required by law, legal process, or to protect our rights
- In connection with business transfers (e.g., merger)

We require third-party partners to protect your information consistent with this policy.

We never share, sell, or transmit your audio data, sleep data, or health data to any third party.

4. Data Retention and Security

We aim to keep your data secure. We implement reasonable administrative, technical, and physical safeguards to protect information from unauthorized access, disclosure, or destruction. However, no method of transmission over the internet is completely secure.

All sensitive data (audio processing, sleep analysis, AI insights) is processed on-device and never leaves your phone. Session data synced via iCloud is protected by Apple's end-to-end encryption.

You may delete all your data at any time from within the App (Settings > Delete All Data). We retain automatically collected analytics data only as long as necessary to fulfill the purposes described in this policy.

5. Your Rights and Choices

Depending on your location and applicable laws, you may have rights regarding your information, including:

- Accessing the information we hold about you
- Correcting or updating data
- Deleting your data (available directly in the App under Settings)
- Opting out of certain data practices
- Revoking microphone, camera, HealthKit, or notification permissions at any time via iOS Settings

To exercise these rights, please contact us using the details below.

6. Changes to this Policy

We may update this Privacy Policy from time to time. We will notify you by posting the new policy on this page and updating the effective date. Your continued use of the App after changes signifies your acceptance of the revised policy.

9. Contact Us

If you have questions or concerns about this Privacy Policy, you may contact us at:
